Application for authorisation in terms of the National Environmental Management Act, 1998 (Act No. 107 of 1998), as amended and the Environmental Impact Assessment Regulations, 2014

PROJECT TITLE

**PROPOSED SPORTS FACILITY AND ASSOCIATED INFRASTRUCTURE AT THE NORTH-WEST UNIVERSITY:
MAHIKENG CAMPUS, ON THE REMAINDER OF ERF 1090 MMABATHO UNIT 5, NORTH WEST PROVINCE**

Kindly note that:

1. This form must always be used for applications that must be subjected to Basic Assessment or Scoping & Environmental Impact Reporting where this Department is the competent authority.
2. This form is current as of December 2014. It is the responsibility of the applicant to ascertain whether subsequent versions of the form have been published or produced by the competent authority.
3. A proponent must pay a fee for the processing of environmental impact assessment applications as set out in the Fee Regulations¹ published in terms of sections 24(5) and 44(1) of the National Environmental Management Act, 1998 (Act No. 107 of 1998). A fee of **R2 000** is applicable to an application which must be subjected to **Basic Assessment** and an application for **amendment of an environmental authorisation**, and a fee of **R10 000** is applicable to an application which must be subjected to **Scoping and Environmental Impact Reporting**.

An applicant is excluded from having to pay the application fee if:

- The activity is a community based project funded by a government grant; or
- The applicant is an organ of State

Let's Grow North West Together

4. The application must be typed within the spaces provided in the form. The sizes of the spaces provided are not necessarily indicative of the amount of information to be provided. Spaces are provided in tabular format and will extend automatically when each space is filled with typing.
5. The use of "not applicable" in the form must be done with circumspection. Incomplete applications or applications that do not meet the requirements in terms of Regulation 16 of the 2014 NEMA EIA Regulations will be rejected to be revised and be resubmitted.
6. Unless protected by law, all information filled in on this application will become public information on receipt by the competent authority. Any interested and affected party should be provided with the information contained in this application on request, during any stage of the application process.
7. An application for environmental authorisation/amendment lapses if the applicant fails to meet any of the timeframes prescribed in terms of the 2014 EIA Regulations. The applicant must comply with the Project Time Schedule.
8. This application must be handed in at the offices of the relevant competent authority as determined by the Act and regulations.
9. All EIA applications submitted to this Department must be accompanied by a screening report as required in terms of Regulation 16(1)(v) of the 2014 EIA Regulations. The screening tool can be accessed on the following link: <https://screening.environment.gov.za/screeningtool/#/pages/welcome>
10. All reports to be submitted in respect of this application must comply with the content layout requirements stipulated/described in relevant appendices of the 2014 EIA Regulations (i.e. Appendix 1 – 7). All maps should be in A3 format and the landowner consent must be attached if the Applicant is not the landowner.

PROJECT DESCRIPTION

Please provide a detailed description of the project.

The North-West University (NWU) Mahikeng Campus plans to establish Hockey and Cricket sports facilities (the “additional sports fields”) in addition to the existing soccer and rugby sports fields at the Mahikeng Campus. Pavilions, change-rooms, club houses, parking lots, future sports fields and access roads are also planned in the future development of these additional sports fields.

These additional sports fields will have grass fields with adequate irrigation and high-mast lighting. Storm water will be collected and connected above ground to the existing storm water channels on site.

Water for irrigation of the proposed sports field as part of Phase 1, will be obtained from the existing irrigation dams to the north of the soccer field, via a 110mm irrigation line towards the cricket field.

When the clubhouses are constructed as part of Phase 2, sewer will be collected in an underground tank and pumped in a southern direction to the main outfall sewer line, which is located next to the existing paved road to the south of the fields.

The 11kV cables from the existing cable network connection point to the new Miniature substation position will be laid at a minimum depth of 1000mm below ground level with a trench width of 450mm. The LV feeder cables, i.e. cables from the new miniature substation to the light masts, will be laid at a minimum depth of 800mm with a trench width of 300mm.

The lighting masts heights will be between 18m and 25m high at most and the foundation or reinforced concrete footings for the lighting masts will require a hole dimension of 1400mm deep, 4000x4000mm for each mast.

2. ACTIVITIES APPLIED FOR TO BE AUTHORISED

For an application for authorisation that involves more than one listed or specified activity that, together, make up one development proposal, all the listed activities pertaining to this application must be indicated.

Indicate the number and date of the relevant notice:	Activity No (s) and Activity Description (in terms of the relevant notice)	Describe each listed activity as per project description
e.g. GN.R. 327, 4 December 2014	5(i) the development and related operation of facilities or infrastructure for the concentration of more than 1000 poultry per facility within an urban area excluding chicks younger than 20 days	Construction of broiler houses that will accommodate 2000 chickens per facility within urban area
GN.R. 327, 4 December 2014	(19) The infilling or depositing of any material of more than 10 cubic metres into, or the dredging, excavation, removal or moving of soil, sand, shells, shell grit, pebbles or rock of more than 10 cubic metres from a watercourse.	Several natural drainage features, classified as non-perennial minor drainage lines were identified throughout the project area. Additionally, one artificial drainage channel was identified within the project area as a result of berms causing runoff along them. As a result of the establishment of the sports facility and associated infrastructure, there will be infilling or depositing of material of approximately 2000m ³ into the drainage lines on site.

Indicate the number and date of the relevant notice:	Activity No (s) and Activity Description (in terms of the relevant notice)	Describe each listed activity as per project description
GN.R. 327, 4 December 2014	(27) The clearance of an area of 1 hectares or more, but less than 20 hectares of indigenous vegetation, except where such clearance of indigenous vegetation is required for— (i) the undertaking of a linear activity; or (ii) maintenance purposes undertaken in accordance with a maintenance management plan.	The site for the proposed sports facilities is located in an area where camel thorn trees (indigenous trees) and Aloes sp. dominate the area. The site earmarked for the development is approximately 10ha and the camel thorn trees and Aloes will be removed to make way for the proposed development footprint.
GN.R. 324, 4 December 2014	(12) The clearance of an area of 300 square metres or more of indigenous vegetation except where such clearance of indigenous vegetation is required for maintenance purposes undertaken in accordance with a maintenance management plan. h. North West Province (iv) Critical biodiversity areas as identified in systematic biodiversity plans adopted by the competent authority.	There will be approximately 100 000m ² of indigenous vegetation consisting of camel thorn trees (indigenous trees) and Aloes sp. that will be cleared, as a result of the proposed development which will occur within ESA1 and ESA2 for aquatic resources.
GN.R. 324, 4 December 2014	(14) The development of— (ii) infrastructure or structures with a physical footprint of 10 square metres or more; where such development occurs— (a) within a watercourse; (c) if no development setback has been adopted, within 32 metres of a watercourse, measured from the edge of a watercourse; excluding the development of infrastructure or structures within existing ports or harbours that will not increase the development footprint of the port or harbour. h. In North West iv. In Critical biodiversity areas as identified in systematic biodiversity plans adopted by the competent authority	The proposed sports facility will have a physical footprint of 100 000m ² . Several natural drainage features, classified as non-perennial minor drainage lines occur on site and the proposed development will occur within these watercourses and within 32m from the edge of the watercourse. The proposed development will occur within ESA1 and ESA2 for aquatic resources.

Please note that any authorisation that may result from this application will only cover activities specifically applied for.

Is the application fee for Environmental Authorisation Paid?

Yes	No

3. SOCIO-ECONOMIC BENEFITS

3.1 What is the expected capital value to be contributed for North West Province Growth Domestic Product?

None, this will not contribute to the NWP GDP. This project is for improved student life, and would not be generating any capital, as this is a strategic project. The core rationale is to better student life & improve user experience on NWU Mahikeng Campus. The new sports facilities are not planned to generate capital, however aimed at growing sports offering at the NWU Mahikeng campus. However, this will contribute to local SMME's as part of the development phase.

3.2 How many new employment opportunities will be created in the development phase?

Approximately 20 jobs to be created during construction phase to establish the site for development.

3.3 How many permanent employment opportunities will be created during operational phase?

NWU Mahikeng Hockey

- Possible 1x Hockey Coach: Ladies & Gents
- Possible 1x Manager/Officer: MC Hockey
- General landscape maintenance & general upkeep will be done by the NWU MC Facilities Maintenance Services by appointing yearly contractors offering landscape maintenance & general upkeep services. This will create a lot of contract employment and offer opportunity to service providers in & around the NWP.

NWU Mahikeng Cricket

- Possible 1x Cricket Coach: Ladies & Gents
- Possible 1x Manager/Officer: MC Cricket
- General landscape maintenance & general upkeep will be done by the NWU MC Facilities Maintenance Services by appointing yearly contractors offering landscape maintenance & general upkeep services. This will create a lot of contract employment and offer opportunity to service providers in & around the NWP.

3.4 What is the **estimated conclusion date of the activity or activities applied for** (excluding activities that have operational phase)?

30 June 2030

4 OTHER AUTHORISATIONS REQUIRED

4.1 DO YOU NEED ANY AUTHORISATIONS IN TERMS OF ANY OF THE FOLLOWING LAWS?

- | | |
|--|---|
| 4.1.1 National Environmental Management: Waste Act | Yes /No |

**SCREENING REPORT FOR AN ENVIRONMENTAL AUTHORIZATION AS
REQUIRED BY THE 2014 EIA REGULATIONS – PROPOSED SITE
ENVIRONMENTAL SENSITIVITY**

EIA Reference number: NWU Sports Facilities

Project name: NWU Sports Facilities

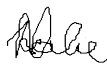

Project title: NWU Sports Facilities

Date screening report generated: 15/04/2025 07:57:05

Applicant: NWU

Compiler: N. Lalie

Compiler signature:

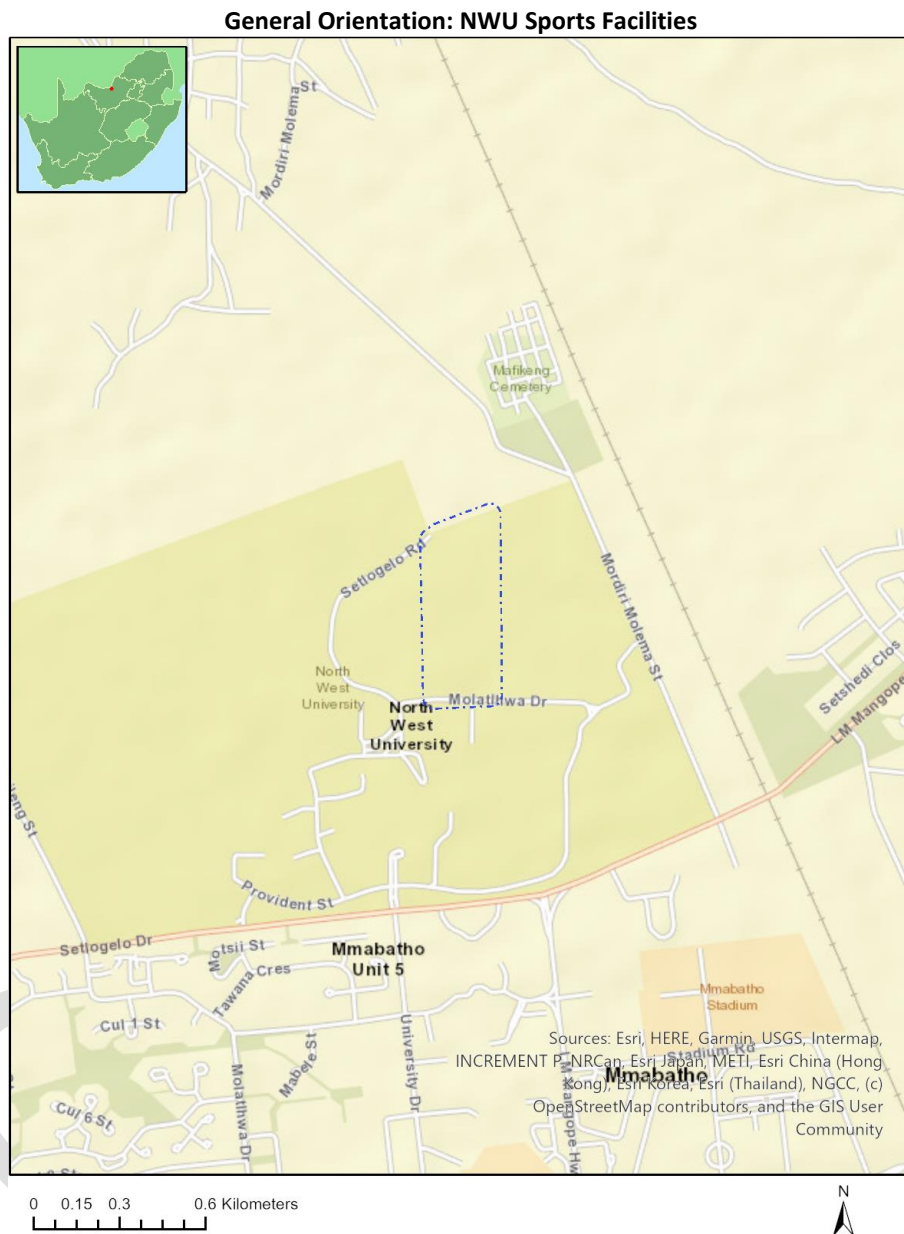

Application Category: Any activities within or close to a watercourse

Development footprint¹ vertices:

No development footprint(s) specified.

Wind and Solar developments with an approved Environmental Authorisation or applications under consideration within 30 km of the proposed area

No	EIA Reference No	Classification	Status of application	Distance from proposed area (km)
1	14/12/16/3/3/1/997/AM1	Solar PV	Approved	23.3
2	NWP/EIA/62/2021	Solar PV	Approved	23.3
3	14/12/16/3/3/1/997	Solar PV	Approved	23.3
4	14/12/16/3/3/2/272	Solar PV	Approved	7.3

¹ "development footprint", means the area within the site on which the development will take place and includes all ancillary developments for example roads, power lines, boundary walls, paving etc. which require vegetation clearance or which will be disturbed and for which the application has been submitted.

Environmental Management Frameworks relevant to the application

No intersections with EMF areas found.

Environmental screening results and assessment outcomes

The following sections contain a summary of any development incentives, restrictions, exclusions or prohibitions that apply to the proposed development site as well as the most environmental sensitive features on the site based on the site sensitivity screening results for the application classification that was selected. The application classification selected for this report is:

Any activities within or close to a watercourse.

Relevant development incentives, restrictions, exclusions or prohibitions

The following development incentives, restrictions, exclusions or prohibitions and their implications that apply to this site are indicated below.

Incentive, restriction or prohibition	Implication
Strategic Transmission Corridor-Northern corridor	https://screening.environment.gov.za/ScreeningDownloads/DevelopmentZones/Combined_EGI.pdf
Main Electricity Distribution Substation	https://screening.environment.gov.za/ScreeningDownloads/DevelopmentZones/Distribution_Transmission.pdf

Proposed Development Area Environmental Sensitivity

The following summary of the development site environmental sensitivities is identified. Only the highest environmental sensitivity is indicated. The footprint environmental sensitivities for the proposed development footprint as identified, are indicative only and must be verified on site by a suitably qualified person before the specialist assessments identified below can be confirmed.

Specialist assessments identified

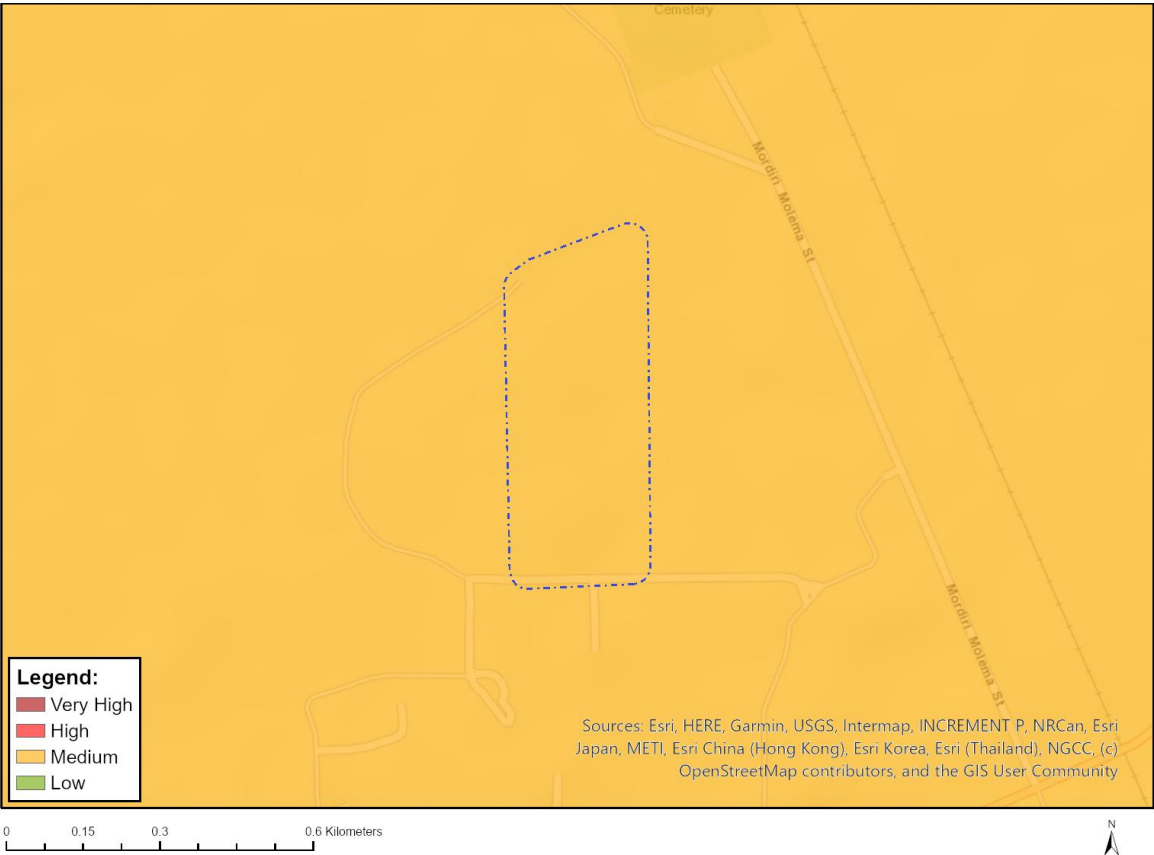

Based on the selected classification, and the known impacts associated with the proposed development, the following list of specialist assessments have been identified for inclusion in the assessment report. It is the responsibility of the EAP to confirm this list and to motivate in the assessment report, the reason for not including any of the identified specialist study including the provision of photographic evidence of the site situation.

Results of the environmental sensitivity of the proposed area.

The following section represents the results of the screening for environmental sensitivity of the proposed site for relevant environmental themes associated with the project classification. It is the duty of the EAP to ensure that the environmental themes provided by the screening tool are comprehensive and complete for the project. Refer to the disclaimer.

MAP OF RELATIVE ANIMAL SPECIES THEME SENSITIVITY

Where only a sensitive plant unique number or sensitive animal unique number is provided in the screening report and an assessment is required, the environmental assessment practitioner (EAP) or specialist is required to email SANBI at eiadatarequests@sanbi.org.za listing all sensitive species with their unique identifiers for which information is required. The name has been withheld as the species may be prone to illegal harvesting and must be protected. SANBI will release the actual species name after the details of the EAP or specialist have been documented.
